## SPARKLING FURNITURE ACCESSORIES

► **Producer:** KristallLang  
► **Web:** [www.kristallang.ch](http://www.kristallang.ch)

Incorporating loose cut Swarovski crystal elements into bathroom accessories and handles for doors and furniture, KristallLang can now offer its Kristal Light system. The visual impact of the white and coloured crystal elements is increased by illuminating the handle. Each item is unique due to the combination of crystals used and can be customised to an owner's specification.

## FIRE ALARM PANEL

► **Producer:** Smart Switch  
► **Web:** [www.smartswitch.co.nz](http://www.smartswitch.co.nz)

Smart Switch has launched a networked marine fire alarm system, capable of monitoring up to eight zones. The system is composed of an FR-8000 display unit, an FR-100 zone controller that manages each fire sensor, and up to two optional FEC-6 engine room controllers. Fire alarm zones can be renamed on the display unit by the user to allow faster identification of alarms or fault occurrences.

## WINCH HANDLE

► **Producer:** Lewmar  
► **Web:** [www.lewmar.com](http://www.lewmar.com)

Marine equipment supplier Lewmar has designed a floating, composite winch handle. A push button locking mechanism locates it into all standard bi-square sockets. One- or two-handed operation is enabled by the power grip handle. The composite construction ensures that if the handle is dropped, it will minimise damage to the deck.

## ON BOARD AQUARIUM

► **Producer:** Living Color  
► **Web:** [www.livingcolor.com](http://www.livingcolor.com)

Living Color has recently completed the installation of custom designed aquariums on several superyachts. This particular installation is made of solid maple hardwood with fluted columns and raised panel doors to complement interior furnishings.

## SPINNAKER SAILCLOTH

► **Producer:** Contender Sailcloth  
► **Web:** [www.contendersailcloth.com](http://www.contendersailcloth.com)

The Maxikote and Superkote polyester spinnaker materials from Contender Sailcloth are coated with a polyurethane based chemical to increase water repellency and reduce porosity. An enhanced version was used in the Volvo Ocean Race.
